State-of-the-Art Manufacturing

It is our goal to offer perfect products to our customers. That's why it is necessary to utilize correspondingly modern technologies for production. This standard of production is yielded by well - trained and highly motivated employees in combination with the most modern and eco-friendly machinery. To ensure continuously high quality for our customers, our company pursues the philosophy of a high vertical integration in production.

According to our philosophy to excel in stainless steel, we process this material solely. This requires very special equipment for the material's mechanical treatment as well as the expertise to know how to process stainless steel properly. To the great extent feasible, we employ computer - assisted machines. This computer assistance results in an increased precision and in minimized errors during production.

All parts and products are treated in a special pickling solution prior to leaving our company.

The entire area of our design and construction services, as well as production, is subject to sustained quality control evidence which is documented by the relevant certificates.

Experience, knowledge and vision provide the foundation of our design and construction activities which, together with our skilled staff, pave the way for optimized manufacturing and products which offer maximum efficiency, security and reliability.

This approach has made us a worldwide renowned manufacturer of quality products and we are committed to this philosophy for the future.
