About Huber

Innovative equipment and machinery made of stainless steel for municipal and industrial water and wastewater treatment

Competence in stainless steel - Leading in WWT

HUBER provides state-of-the-art equipment for municipal and industrial water and wastewater treatment. The main focus is liquid/solid separation in general and headworks equipment in particular as well as a comprehensive line of stainless steel equipment.

The HUBER Group with its more than 1,200 employees worldwide is successfully operating in the environmental engineering sector and continuously approves and develops new products for their customers.

HUBER invented and introduced the famous ROTAMAT® products and STEP SCREEN®s. Today it boasts more than 50,000 installations worldwide proving their unmatched experience and expertise.

With its more than 60 subsidiaries, representative offices and agents, the HUBER Group is among the worldwide leading suppliers in the field of wastewater/sludge treatment and process engineering. With more than 175 years of commitment to drinking water and wastewater treatment, HUBER has always been an innovator in this field with a continuous focus on the development of new solutions to conserve one of our most valuable resources: water.

As the Australian Agents for HUBER Technology, Hydroflux has access to this global network of expertise. There are over 200 local Australian installations of HUBER equipment.
